# WHAT YOU SHOULD KNOW?

## WHAT IS “POKING”?

Poking is the term to describe what IV Drug users do to clean blood-contaminated syringes to use again or share.

---

## SOAP DISPENSER POKING!

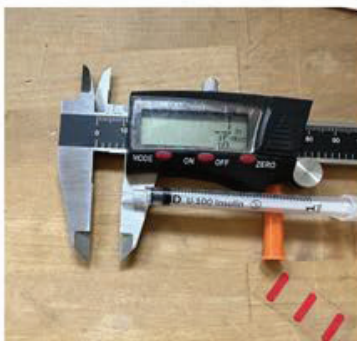

Poking is the insertion of a dirty needle into either a soap cartridge, bulk soap reservoir, or toilet paper supply to clean the syringe and not cause the syringe to bend or break.

---

## TOILET TISSUE DISPENSER POKING!

Poking of Toilet Paper may not harm the syringe, but will contaminate the paper roll with blood-borne pathogens. Then that paper is used on sensitive and vulnerable parts of the body by unsuspecting people who now are at risk of viral or bacterial disease transmission.
